

SANTA CLAUS HEADQUARTERS.

WE have received a good portion of our Xmas Goods, and when complete our stock will be Santa's Supply House.

Don't overlook the fact that all our Holiday stock is BRAND NEW—no left-over shop worn goods—and you can buy these new goods at less than the old stock. Don't be caught by "selling-out" price lists. We are going to sell out our Holiday stock. We always do, because our prices are right. Don't try to fool the kiddies—they know that Santa Claus' goods are always new and bright.

1000 Xmas & New Year Cards

JUST RECEIVED

We will sell them at our wonder prices—Some 10 each, some 2 for 10 & upwards.

The 1914 War Illustrated
THE Bow Island Review

AND
Western Home Monthly
(Western Canada's most popular magazine)

FOR ONE YEAR
ALL FOR \$1.50

"The 1914 War Illustrated" contains over 300 remarkable war photographs with much valuable information as to the causes leading to the great struggle, and other important data including the military and naval strengths of the countries involved. Two interesting maps—one of the war zone, and the other (in four colors) of Europe are also included. This invaluable Hand-book of the war is printed on art paper with an attractive pictorial cover, and is the best publication of its kind in Canada.

British Battleship Sinks with Loss of Between 700 and 800 Men.

Sheerness, England, Nov. 26.—As the British battleship Bulwark was lying off here this morning there occurred a terrible explosion which completely destroyed the ship. Of the crew of 700 or 800 men who were aboard at the time, only fourteen survived. The cause of the explosion is not known for a certainty, but it is believed that it occurred in her forward magazine, whether by accident or design is a question to be determined by the commission which has been appointed to investigate the affair.

In the opinion of naval men it was an internal explosion that put an end to the battleship which for 12 years had done service at home and abroad and lately had been doing her part in guarding England's shores. There was no great upheaval of water such as would have occurred if she had been torpedoed or struck a mine. Instead the ship was enveloped in smoke and flame and when this had cleared nothing could be seen but wreckage floating on the sea.

The Bulwark was commissioned in 1902, and carried a complement of 781 officers and men. The cost of the battleship was \$5,000,000.

German Forces Defeated by Russian.

London, Eng., No. 26.—"The Russians have defeated the Germans with the heaviest losses yet suffered; the Germans have made no advance since I last addressed this House, and the British are in touch with Turkish forces 30 miles east of the Suez Canal," were salient points of a speech made by Field Marshal Earl Kitchener in the House of Lords.

Rome, Nov. 26.—A despatch published by the Giornale d'Italia says that in the new German retirement from Poland the invaders lost one-fourth of their effective forces.

Communication between the German and Austrian armies is declared to have been definitely broken off and the Russians are marching on Breslau, Posen and Thorn with great rapidity. The despatch says that the Austro-German defeat is assuming colossal proportions and will undoubtedly prove decisive.

Gasoline from Natural Gas.

Natural gas may be divided into two main classes, viz.: Dry gas which is composed largely of Methane and flows in large quantities from non-oil bearing or "dry" lands and gas containing liquidifiable vapors and known in oil fields as "wet" gas. This latter gas is the basis of the natural gasoline industry, an industry supplying a great deal of the gasoline of commerce.

Natural gas is a mixture of Paraffin Hydrocarbons, Methane, Ethane, Butane, Propane, with Oxides, Carbon Dioxide, Oxygen, Nitrogen, and Hydrogen and where the gas is wet heavier hydrocarbons, i.e., Propane, Butane, etc., must be present in considerable amount.

The extraction of natural gas gasoline from natural gas as an industry is a new one, and dates from 1908. This process is simply one of compression and refrigeration, the compression generally being done in two stages and up to 300 pounds per square inch. All natural gases are not suitable for the production of this gasoline. Methane or Marsh gas called "dry natural" would require a pressure of 700 to 800 lbs. per square inch and would produce liquid gas and not gasoline. The pressure is not commercially possible in the industry. This dry gas does not contain liquidifiable vapors convertible to gasoline.

Natural gas flowing from strata containing oil yields volatile liquids carried in suspension as condensable vapors. Depending on its richness in such vapors the gas will yield from one half to two gallons per 1,000 cu. ft. of gas.

The extraction of this gasoline uses up about 10 to 15 per cent. of the original gas but does not decrease its heating value as the exhaust gas from the process may be used as a fuel.

The physical characteristics which lend most readily to a right estimation of the gasoline value of a gas are its gravity, odor, flame, color, condensation of gasoline from flowing lines in cold weather, etc. Any oil driller will recognize gas that "lays down on the derrick floor" and drives the men from the rig. The strong pungent odor of gasoline is unmistakable in gases rich in heavy constituents. In general it is regarded to flame, the white flame the richer the gas is in gasoline components.

The new Evans-Dorri school is about completed and a dance is to be held here soon.

The gasoline available from working natural gas is very high grade, even running to 100 Beams. The higher grades are very rich in aromatic hydrocarbons and when mixed with refinery run have the power of forming homogeneous mixtures.

In regard to gas from the Alberta field, that from the Bow Island field, is absolutely dry, being composed mostly of Methane, while that from the Dinosaur district contains condensable vapors. The gas from the recently discovered Viking field is new under examination as to its commercial possibilities.

Selz District.

The Selz district school No. 273 reopened on Monday, November 16, with Mr. Theo. Steele as the new teacher. The former teacher, Mr. T. C. Connor, has been promoted and is now in charge of the Buddett school. Mr. Steele was for the first six months of the year 1914, and for the first six months of the year 1915, and for the first six months of the year 1916, and for the first six months of the year 1917, and for the first six months of the year 1918, and for the first six months of the year 1919, and for the first six months of the year 1920, and for the first six months of the year 1921, and for the first six months of the year 1922, and for the first six months of the year 1923, and for the first six months of the year 1924, and for the first six months of the year 1925, and for the first six months of the year 1926, and for the first six months of the year 1927, and for the first six months of the year 1928, and for the first six months of the year 1929, and for the first six months of the year 1930, and for the first six months of the year 1931, and for the first six months of the year 1932, and for the first six months of the year 1933, and for the first six months of the year 1934, and for the first six months of the year 1935, and for the first six months of the year 1936, and for the first six months of the year 1937, and for the first six months of the year 1938, and for the first six months of the year 1939, and for the first six months of the year 1940, and for the first six months of the year 1941, and for the first six months of the year 1942, and for the first six months of the year 1943, and for the first six months of the year 1944, and for the first six months of the year 1945, and for the first six months of the year 1946, and for the first six months of the year 1947, and for the first six months of the year 1948, and for the first six months of the year 1949, and for the first six months of the year 1950, and for the first six months of the year 1951, and for the first six months of the year 1952, and for the first six months of the year 1953, and for the first six months of the year 1954, and for the first six months of the year 1955, and for the first six months of the year 1956, and for the first six months of the year 1957, and for the first six months of the year 1958, and for the first six months of the year 1959, and for the first six months of the year 1960, and for the first six months of the year 1961, and for the first six months of the year 1962, and for the first six months of the year 1963, and for the first six months of the year 1964, and for the first six months of the year 1965, and for the first six months of the year 1966, and for the first six months of the year 1967, and for the first six months of the year 1968, and for the first six months of the year 1969, and for the first six months of the year 1970, and for the first six months of the year 1971, and for the first six months of the year 1972, and for the first six months of the year 1973, and for the first six months of the year 1974, and for the first six months of the year 1975, and for the first six months of the year 1976, and for the first six months of the year 1977, and for the first six months of the year 1978, and for the first six months of the year 1979, and for the first six months of the year 1980, and The Invitation

THE ENTERTAINER

Autumn Birthday Party

THESE brilliantly colored trees and late flowers of October are just the proper setting for a birthday party, so gather the little friends of your daughter or son together and have a real autumn frolic. The warm sunny days of this month make it possible to entertain out of doors, on the lawn or veranda. If you choose the latter, decorate it with autumn leaves and goldenrod, so that it will be a veritable autumn bower.

sketches of autumn leaves or flowers. At the top print: "Autumn gave a party," and below word the invitation in the usual form.

Children are not critical guests, and even the simplest of birthday parties will be enjoyable. To make the party a success from the child's point of view, you will have to invite every small friend in the neighborhood, so be prepared to entertain thirty or more children, if you have accommodations for so many.

SUNSHINE AND SPACE

By Ethel Davis Seal

[illegible][illegible]

If the spaces are across window widths, they should be set into moldings, be of one height and be set down on the floor, or in the slightly different manner shown in the drawing in which the mirror reflects the chandelier. This position of a mirror seemingly enlarges the room and reflects the general light of the room.

Mirrors can be set into the panels of a door or into the frame. Or they may be set into the wall above the door opening. This gives an excellent effect if the position of the door itself is somewhat formal. If it does not occupy an attractive space

or is not attractively placed in the space, this should not be attempted. The mirror should be placed on the right-hand wall is distinctive in the room. The mirror is placed on the left side in the sketch of the drawing room. A desk table is placed below one mirror. A large unadorned sofa beneath the other. The sideboard is placed beneath the mirror, which nicely fulfils the double duty of lighting and enhancing the room.

In another drawing you will see a large mirror placed above a dining room table. The table is placed below the mirror, which you can see reflected in the mirror. And in this way a dining room can be

Even turned from a dark and dimly lit room to a room quite bright enough to see the man's face.

Never got one large mirror directly across the room, but a small one in the opposite corner. In this way you could maintain the disquieting effect of seeing many, many rooms at once. This is a disconcerting when you are reasonably sure you're in only one. But if it's your room, you might get the habit. And if it's not, the drug thing reinforced a sense of timelessness. It's a falling which is not aware of falling.

Superior Hotel, the position of first floor to the small, dark apartment, but lighted by a single candle, the apartment.

**FACTORY GROWTH
WESTERN CANADA**

Remarkable Increase in Manufactures as Shown by the Census Figures of the Past Ten Years

While the figures of the census of the manufactures of Canada, 1911, reflect with emphasis the extraordinary industrial development of Canada during the past decade, particularly in the five years following 1906, the most surprising and gratifying growth is west of the great lakes. In the three prairie provinces, Manitoba, Saskatchewan and Alberta, Manitoba has made great strides industrially since 1906, while the other two provinces particularly Alberta, have also made greater progress in manufactures since 1906 than before that. Here is the story:

MANITOBA

(1910 Compared with 1906)

Establishments: Increase 24%
Capital: Increase 74%
Employees: Increase 109%
Salaries and wages: Increase 109%
Value of Products: Increase 89%

SASKATCHEWAN

(1910 compared with 1906)

Establishments: Increase 115%
Capital: Increase 77%
Employees: Increase 125%
Salaries and wages: Increase 170%
Value of Products: Increase 135%

ALBERTA

(1910 Compared with 1906)

Establishments: Increase 145%
Capital: Increase 425%
Employees: Increase 345%
Salaries and wages: Increase 245%
Value of products: Increase 365%

Increases in a five year period that exceed 100 per cent. show phenomenal development, but when they exceed two hundred per cent. there is surely a progress which will attract the eyes of the world. More manufacturing in the West is as yet but in early infancy, and it does not require any stretch of imagination to see in the near future tall chimneys, busy workshops, and an array of workers in thriving populous centres throughout the West.

The increase in manufactures in the three prairie provinces during the two periods 1900 and 1906, and 1906 to 1910 was as follows:

	1900	1906	1910
Establishments:			
Manitoba	324	354	429
Capital:			
Manitoba	\$ 1,539,681	\$27,517,297	\$47,941,540
Employees:			
Manitoba	6,519	10,438	17,328
Salaries and Wages:			
Manitoba	\$ 2,419,549	\$ 5,569,571	\$10,912,466
Value of Products:			
Manitoba	\$13,937,409	\$28,116,732	\$72,671,699

In the year 1900, the manufacture of Alberta and Saskatchewan were so insignificant that they were not on the same total as Alberta. Saskatchewan, 1901: capital, \$1,539,681; employees, 1,051; salaries and wages \$145,773, and value of products, \$1,761,987.

By 1906 there was a different tale to tell, however, for by this time the figures in other provinces were greater by far than the combined totals for the two provinces in 1900.

SASKATCHEWAN

	1900	1906
Establishments	89	171
Capital.....	\$3,972,075	\$7,019,956
Employees	1,441	2,326
Sal. and wages	721,575	1,261,524
Val. of Prods.....	\$2,129,172	\$6,232,113

ALBERTA

	1900	1906
Establishments	120	249
Capital.....	\$5,515,521	\$29,311,241
Employees	2,045	6,386
Sal. and wages	1,167,107	4,214,643
Val. of Prods.....	\$1,114,783	\$16,068,112

Here is a statement which shows the development in the West since 1900 compared with the whole of Canada:

	Establishments	Capital	Employees
Canada	315	178	6
Manitoba	9%	245	287
Sask.	116%	77	12
Alberta	142%	429	241

	Salaries and wages	Products
Canada	112% increase	142
Manitoba	140%	120
Saskatchewan	170%	101
Alberta	265%	285

Admires Canadians

In the comparison of the numbers of millions of population our country is so far ahead of what we call Canada that the figures are never used in relation to respective advancement. We think not so much about the increase of population up there as upon the magic development of vast stretches of Britain; the rapid opening of a new country. And those who have had opportunity to observe with their own eyes must admit that our neighbors in the north-west, in Manitoba, Saskatchewan, Alberta, and British Columbia, have been doing things in a few years next to satisfy our pride in them as neighbors and relatives. They show vigor, enterprise, daring and the nerve for great expenditures.

**Will Canada Carry Her
Burden ?**

GREAT BRITAIN AND EUROPE, where productive industry has been paralysed, have mouths to feed, bodies to clothe, constructive operations to carry through, and a thousand and one wants and needs to be satisfied—and Great Britain and Europe look to Canada in confidence for much of the needed supplies.

It were folly for Canadian manufacturers and merchants to be downhearted during these terrible times in Europe. A great burden—a great duty—a great responsibility—has been imposed on Canadian manufacturers, merchants, bankers and workers. Shall Canada and Canadians shirk this burden, this duty, this responsibility?

What's the Answer ?
